LUNGLEY Gallery is pleased to present *Her Vision*, a solo exhibition by Dan He.

Dan He's practice hinges on her reinterpretation of the traditional theme of the 'male gaze' by representing the female form as a dominant and empowering force, in opposition to its historical interpretation as submissive and sexual. Dan He's paintings fuse together primitive and futuristic symbols, while their formal qualities present intriguing contradictions, combining curves and straight lines and both the flat and the three-dimensional, creating a paradoxical balance in subject and formal qualities.
